

## A hassle-free approach to environmental legal compliance

It is **challenging** to keep up with environmental legal requirements and the various changes that take place. A **simple way** to keep up to date is through regular compliance audits and periodically maintaining and updating a **register of relevant environmental legislation**.

**Responsibility:** → Individual Companies.

Individual companies have a legal responsibility to know what legislation is applicable to them and the activities that they undertake.

**What:** → Compliance with legal requirements.

ISO 14001 requires that organisations **demonstrate evidence** of compliance with legal requirements. Most organisations will undertake a form of **legal compliance audit**, whether internally or more commonly as a contracted-out service with an environmental consultancy such as **Mabbett**.

**How:** → e legal-lite and e legal-pro

Mabbett have provided these services successfully for many years to our clients through two products, **e legal-lite** and **e legal-pro**: a **hassle-free approach to updating your environmental legal register** quarterly, bi-annually or annually.

### e legal-lite from **Mabbett™**

Upkeep of a legal register that contains all the relevant environmental legislation:

- Quarterly email summary updates to help you keep on top of the most recent legal requirements for your business.
- A full annual legal register update.

### e legal-pro from **Mabbett™**

A proactive approach to maintaining a legal register that is ISO 14001 compliant:

- Quarterly email summary updates.
- A full quarterly, bi-annual or annual legal register update.
- Annual legal compliance audit.
- Audits at planned intervals, supporting evidence of legal compliance.

Mabbett can assist your company to become environmentally compliant by reducing the in-house time and effort required to undertake these activities, while maintaining an up to date audit schedule and legal register.

#### What our clients say:

*"The e legal-pro is good for us and breaks the legislation down into manageable chunks which I can pass onto our facilities management team."* **Jane Findlater, KCA Deutag Drilling Ltd**
